STATE CLEARINGHOUSE

NEWSLETTER

May 16th-31st, 2004

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **May 16-31, 2004**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Associate Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

Governor's Office of Planning and Research State Clearinghouse

Date: December 5, 2003

To: All CEQA Lead Agencies

From: Terry Roberts, Director, State Clearinghouse

Re: Submission of Electronic CEQA Documents to State Clearinghouse

In order to take advantage of the cost and time savings associated with electronic documents, the State Clearinghouse will accept electronic documents under the following conditions:

1. Electronic documents shall be on CD, and the file format shall be either Adobe PDF or Microsoft Word.
2. For EIRs, each CDs must be accompanied by a printed copy of the Executive Summary. This allows the State Clearinghouse and the reviewing agencies to efficiently route the document to the proper persons.
3. Negative Declarations and Mitigated Negative Declarations will not be accepted on CD. However, any separately bound technical appendices to the document may be submitted on CD.
4. For certain projects, particularly large infrastructure projects such as airport expansions, the State Clearinghouse may request a certain number of hard copies. In addition, the lead agency shall honor a special request from a responsible or trustee agency which requires a hardcopy for purposes of review and comment.
5. This policy does not invalidate CEQA Guideline §15205, which requires a public agency submitting printed documents to the State Clearinghouse to send, in addition, an electronic copy of the document, *if available*.

If you have any questions regarding the submission and circulation of environmental documents, please contact the State Clearinghouse at (916) 445-0613 or state.clearinghouse@opr.ca.gov.

**ENVIRONMENTAL DOCUMENT FILINGS
WITH THE STATE CLEARINGHOUSE
Calendar Years 1999 through 2003**

	NOP	EIR	ND/MND	NOD	NOE	EA	EIS	OTHER	Total Documents	Total Projects
1999	602	481	2007	1808	2699	41	22	177	7,837	6,715

KEY:

NOP	Notice of Preparation
EIR	Draft Environmental Impact Report
ND/MND	Negative Declaration/Mitigated Negative Declaration
NOD	Notice of Determination
NOE	Notice of Exemption
EA	Environmental Assessment (federal)
EIS	Environmental Impact Statement (federal)
OTHER	Other types including Final EIRs, Early Consultation, etc.

NOTE:

There are more Total Documents than Total Projects because there are often multiple environmental documents filed for any individual project.

CEQA Documents

Key for abbreviations of Document Type:

CON	Early Consultation Notice
EIR	Draft Environmental Impact Report
SIR	Supplemental EIR
SBE	Subsequent EIR
EIS	Draft Environmental Impact Statement
EA	Draft Environmental Assessment
JD	Joint Document (CEQA/NEPA)
FONSI	Finding of No Significant Impact
Neg Dec	Negative Declaration/Mitigated Negative Declaration
NOE	Notice of Exemption
NOD	Notice of Determination
NOP	Notice of Preparation (of an EIR)
Oth	Other type (none of the above)

<u>Documents Received on Monday, May 17, 2004</u>			
2002121142	<p>Rancho San Juan Specific Plan and Butterfly Village Project Monterey County --Monterey</p> <p>Specific Plan: The Rancho San Juan Specific Plan is a blueprint for the development of a new urban village along the northern border of the City of Salinas. The specific plan area is bounded by Highway 101 on the west, Russell Road on the south, and San Juan Grade Road on the east. The fully developed 2,581-acre site will provide 4,000 residential units distributed over a wide variety of unit types and sizes, many affordable to low- and moderate-income families and targeted to the workforce of the Salinas Valley.</p> <p>Butterfly Village (HYH Corporation): Approximately 671 acres within Rancho San Juan (26% of the Specific Plan total) consists of property held by the HYH Corporation which proposes to construct Butterfly Village, the first phase of the Rancho San Juan Specific Plan. The proposal for Butterfly Village includes 1,077 residential units, an 18-hole golf course, clubhouse, golf resort villas, sewage treatment plan and 40,000 square feet of mixed-use neighborhood commercial.</p>	EIR	07/12/2004
2003012104	<p>Lower Cascade Canal - Banner/Cascade Pipeline Project Nevada Irrigation District --Nevada</p> <p>In order to increase the capacity and long-term reliability of its raw water conveyance system serving two water treatment plants within its service area, NID proposes the following: (1) installation of new 48-inch and 36-inch raw water pipelines, (2) maintenance of two NID canals as service laterals with reduced flows, and (3) construction of a 1.5 MW hydroelectric generating facility.</p>	EIR	07/15/2004
2003112087	<p>Tenth / Market / Mission Streets Mixed-Use Project San Francisco Planning Department San Francisco--San Francisco</p> <p>The proposed project would involve construction of a mixed-use development with offices, senior affordable housing, other housing, parking, retail, and other residential community-serving uses, including meeting rooms. The development would entail replacement of seven existing vacant office buildings and a surface parking lot on Tenth Street between Market and Mission Streets and subdivision of the site into at least three parcels.</p>	EIR	06/30/2004
2003102136	<p>65th Street Redevelopment Plan Sacramento, City of Sacramento--Sacramento</p> <p>The Redevelopment Agency of the City of Sacramento proposes to adopt the 65th Street Redevelopment Plan to provide a financing and implementation mechanism by which the Redevelopment Agency can utilize a range of projects, (including traffic/ circulation, water, sewer, and drainage improvements), and programs (including housing, assistance, rehabilitation, development assistance and economic incentive) and work with residents, businesses, and property owners to alleviate the blighted conditions that exist in the Project Area.</p>	FIN

Documents Received during the Period: 05/16/2004 - 05/31/2004

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<u>Documents Received on Monday, May 17, 2004</u>			
2004051086	Erbes Road Improvement Thousand Oaks, City of Thousand Oaks--Ventura The project would widen the Erbes Road right-of-way between Thousand Oaks Boulevard and Falmouth Street from 50 to 59 feet and add a center turn lane, bike lanes and sidewalks. A formal equestrian crossing would also be constructed. Acquisition of right-of-way will be required.	NOP	06/15/2004
2004051087	Ortega Reservoir Improvement Project Montecito Water District --Santa Barbara Covering of an open reservoir to meet coliform and trihalomethane water quality standards. Other components include improvements to the overflow and storm drain systems to prevent water contamination by storm water during rain events.	NOP	06/15/2004
2004052075	Milk Farm Dixon, City of Dixon--Solano The applicant is Milk Farm Associates, a California partnership (MFA). MFA has submitted applications for annexation, general plan amendment, pre-zoning, and sphere of influence modification to the City to facilitate the development of a mixed use project on the site, consisting of highway commercial property, industrial and agricultural uses.	NOP	06/15/2004
2004052076	Hocker Flat Rehabilitation Site: Trinity River Mile 78 to 79.1 Water Resources, Department of --Trinity In joint action with Reclamation and BLM, DWR is evaluating a pilot river rehabilitation project for the reach of Trinity River locally known as Hocker Flat. As a pilot, this project represents the initial efforts to implement the mechanical channel rehabilitation component described in the 2000 ROD. Within the environmental study limits (ESL) of the project, 16 discrete activity areas have been identified. Within these activity areas, a variety of discrete actions may be conducted that are intended to enhance the riparian and terrestrial habitat adjacent to the Trinity River. The following actions may be conducted in one or more activity areas as part of this project. * Removal of Vegetation * Earthwork in the Trinity River Floodplain * Material Transportation * Material Disposal * Revegetation	NOP	06/15/2004
2004052080	Ohlone College Newark Center for Health Sciences and Technology Ohlone Community College District --Alameda Approval of the Ohlone College Newark Center Technology and Health Sciences Master Plan and construction of improvements under the auspices of the Master Plan. Facilities proposed under the Master Plan include approximately 182,000 gross square feet of classrooms, related educational space, faculty and staff offices and support uses. Parking for 650 vehicles would also be provided as well as on-site landscaping, service roads, a detention basin and extension of water, sewer, natural gas, telecommunication and cable television service. 	<p>proposed excavation, unauthorized persons will not be allowed on the site. The RAW, prepared in accordance with Health and Safety Code Section 25356.1(h)(1), includes the excavation and disposal of approximately 198 cubic yards or 14 truckloads of arsenic contaminated soil from the site. Soils will be removed with a backhoe. Excavated soil will be directly loaded by a back-hoe or a front-end loader into transport trucks for transportation and disposal. The concentration of 10 mg/kg for arsenic has been determined as the clean up level, which DTSC has determined to be protective of human health and the environment. Upon completion of excavation work, confirmation sampling will be conducted to verify that all soils above the cleanup level have been properly removed, and the site is safe for construction and occupancy of a classroom. The depth of excavation will be from surface soils up to a maximum depth of 3 feet below ground surface. Excavation and sampling activities are expected to begin in April 2004 and take less than thirty (30) days to complete.</p> <p>All fieldwork will be completed by properly trained and equipped hazardous waste workers. While John F. Kennedy High School classroom buildings are adjacent to the site, controls have been developed to minimize dust generation. Soil wetting and air monitoring (at property perimeter and work area) will occur during the removal action. Furthermore, the site will be stabilized and no excavation will be conducted in times of high wind conditions. The nearest receptors to the excavation are residents approximately 300 feet north of the excavation. In an event that the soils are excavated and cannot be directly loaded for transportation off-site, it will be temporarily stored in staging areas on-site. At the staging areas, all excavated soil will be placed in covered rool-off truck bins or stockpiled on a impermeable barrier and bermed to prevent runoff, and sprayed with water and covered with plastic, if necessary, to prevent dust generation. Each excavation area will be secured and water will be used to control any fugitive dust from blowing onto other areas or properties. All excavated soils will be characterized to determine if soil will be exposed of as either non-RCRA California regulated hazardous waste or non-hazardous waste. Based on the maximum concentration of 32 mg/kg, it is anticipated that the excavated soils will be exposed of as non-hazardous wastes, loaded onto trucks, covered and transported in taped trucks to an approved Class III landfill or fill material on approval by the County of Orange, Integrated Waste Management Department. If the soil is determined to be hazardous waste, then it will be transported to an approved Class I landfill for disposal.</p>		
2004058259	<p>Sierra Army Depot Emergency Permit</p> <p>Toxic Substances Control, Department of, Northern California Permitting Branch --Lassen</p> <p>Department of Toxic Substances Control (DTSC) has granted an emergency permit to Sierra Army Depot (SIAD) to treat hazardous waste munitions by open detonation (OD) in the existing RCRA OD unit pits located in the Demolition Area within the Upper Buning Grounds. This permit is pursuant to Title 22 Cal. Code Regs., Section 66270.61. SIAD received a Notification of Ammunition Reclassification (NAR) No. NAR04-0223-0256. This NAR classified specific lots of munitions as having a stability category of D, "Less than 0.20 Remaining Effective Stabilizer (RES) - Unacceptable stabilizer loss." The permit is effective May 10 through June 28,2004.</p> <p>Munitions to be treated are (55) 5 inch- 38 caliber munitions weighing a total of 840 lbs., and a total of (59) 8 inch- 55 caliber munitions weighing 4,623 lbs. The total weight of the munitions is 5,463 lbs. The emergency detonations will be conducted</p>	NOE

	<p>by US Army EOD personnel specially trained in the process of open detonation in accordance with specified Standard Operating Procedures (SOP). The detonations will occur in the OD pits which were established and used for demilitarization OD operations from the 1950's until 2001. The number and size of detonations will be controlled by safety considerations, packaging, and handling required by the specific lots once they are removed from the bunkers.</p> <p>The identified munitions present a potential safety hazard and are an unacceptable risk for continued storage as bulk propellant, bulk packed components, or as separate loading propelling charges. The risk of auto-ignition of propellant in Stability Category - D increases with time. SIAD has determined that the munitions are too unstable for transportation, thus treatment by an off-site facility is not feasible and there are no alternative on-site treatment methods available. The munitions in question are too large to be handled by any available transportable treatment chamber that could be brought to the site. DTSC concurs with SIAD's assessment that alternative treatment methods are not available and the material should not be transported offsite.</p>

2004051100	E.A. No. 39540, Annual 2004 Riverside County Weed Abatement Program Riverside County --Riverside The Annual 2004 Riverside County Weed Abatement Program, like its predecessors, requires property owners in western Riverside County to remove flammable vegetation constituting a fire hazard from their properties. This includes weed removal around buildings and other structures. Proper Properties under five acres in size require complete removal of such weeds, whereas properties over five acres only partial removal concentrating on weed removal along property lines.	Neg	06/16/2004
2004051101	Tentative Tract Map No. 16885 and Tentative Parcel Map No. 16527 Adelanto, City of Adelanto--San Bernardino The proposed project involves the two (2) following applications: Tentative Parcel Map No. 16527 and Tentative Parcel Map No. 16885. The purpose of the applications is to use the tentative parcel map to create several new parcels, one of which is to be incorporated into part of the proposed tentative tract map that will be further subdivided into single family lots. Both subdivisions include land beyond the area that is common to each of them. Tentative Parcel Map 16527 will establish a 10-acre parcel west of Pearmain Street for residential use and a 30-acre parcel that is solely commercial, located east of Pearmain Street, between Pearmain Street and Highway 395. Tentative Tract Map 16885 will create 79 single family lots on approximately 20-acres with a minimum lot size of 7,200 square feet, although if dedication of parkland is required, this number may be reduced. Tentative Tract Map 16885 will include the 10-acre parcel located west of Pearmain Street that is part of Tentative Parcel Map 16527 and another 10-acre parcel that is part of Tentative Parcel Map 16528, which was previously submitted and is located northwest of the intersection of Pearmain Street and Victor Street. The proposed project will include the adoption of a negative declaration. The new tract and parcel boundaries will be consistent with the boundaries of the R1 (Single Family Residential) and C (General Commercial) General Plan and Zoning Districts on the property. The total size of the projects is approximately 50.0 acres.	Neg	06/16/2004

	<p>existing site to American with Disabilities Act (ADA) standards. Work will:</p> <ul style="list-style-type: none"> -Pave parking area with asphalt, the table site will be compacted 3/4- minus crushed shale and the tent site will be compacted native soil. -Pave fire ring with interlocking pavers to allow for water drainage and expansion by tree roots. -Border the entire campsite with 4"x 6" pressure treated lumber set into the ground with the wood 1/2-inch just above grade level. No part of the campsite has a slope steeper than 3% which allows for drainage. -Limit utility and septic trenching to preexisting trenches. Four-inch ABS plastic will connect to the 4,400-gallon septic tank by a direct line from the right rear corner of the host pad to a knockout in the solid side of the tank. A 2 1/2-foot wide section of the concrete sidewalk will be removed to reopen the existing utility trench to provide water and electricity. Water service will come from the alleyway. The pipe in the alley way will be 1" galvanized, and will be 1" PVC as it sweeps below ground. It will terminate in a 3/4-inch hosebib at the utility post. Trench will be three feet deep, and two feet wide. Electrical service will connect to the sub panel of the adjacent room and is GFCI protected. -Noise from large equipment will occur outside of the breeding season for marbled murrelets (3/24 - 9/15). -A professional archaeologist and Tolowa representative will monitor all ground disturbing activities associated with the proposed project. In the highly unlikely event that previously undocumented archaeological resources are encountered within the project area, work in that location shall be temporarily suspended until an archaeologist who meets the Secretary of Interior Standards has evaluated the find and tribal representatives have been consulted. 		
2004058267	<p>Upper Finegold Creek Watershed Planning Sierra Foothill Conservancy --Madera</p> <p>This project will conduct an in-depth study and analysis of the Finegold Creek Watershed with the end result to be a management plan that will identify stressors and other barriers to watershed health and outline an action plan and timetable for implementation of projects that will improve water quality, quantity, and terrestrial and aquatic habitat protection. Eventually, the Millerton Area Watershed Coalition expects to complete management plans for the entire Upper San Joaquin between Friant Dam and Kerckhoff Dam. The completion of the Finegold Creek plan will not only be a major step toward the goal but will benefit the community by improving the environmental quality of the area. This is one of the quality of life factors that will contribute to their economic regrowth. It is also expected to lead to the identification of a wide variety of restoration and control projects that can be implemented using local contractors. And finally, it will also contribute to fuels management to avoid fires such as the one experienced in 2001, which stripped hundreds of acres of land leaving its subject to excessive erosion.</p> <p>Specific objectives of this project as defined by CALFED include:</p> <ul style="list-style-type: none"> -To facilitate and improve coordination collaboration and assistance among government agencies and other organizations, and local watershed groups. -To develop watershed monitoring and assessment protocols. -To support education and outreach. -To integrate the watershed program with other CALFED program elements. (JABG Grant). Grant Period: 07/01/04 to 06/30/05.</p>	NOE	
2004058273	<p>Glenn County Groundwater Monitoring Network-Monitoring Well Installation Glenn-Colusa Irrigation District (GCID) --Glenn</p> <p>The proposed project will involve the drilling of three 1,000 foot deep groundwater monitoring wells. Wells will be drilled using large truck mounted rotary drilling rigs equipped with a mud pump. Drilling will occur during daylight hours only at drill locations within 200 yards of occupied dwellings. Additional support vehicles including a water tender, front-end loader, pipe truck, and pickup trucks will be parked on-site. The drilling rig and associated equipment will occupy an area of approximately 100 feet by 100 feet. Access for these vehicles will be directly off the adjacent paved or gravel roads. No improvements to site access will be required. A pit to contain drilling wastes (approximately five foot wide by twenty foot long by four foot deep) will be constructed adjacent to the GCID drill site. All drill wastes (rock cuttings and inert bentonite clay) in the pit will be covered over and left on-site upon well completion. A small 8 foot by 10 foot prefabricated shed will be installed over the monitoring well at the GCID site to protect well measurement equipment. Well protection at the Porter and Cleek sites involves installation of 4 steel bollard posts around the concrete well head pad.</p> <p>Potential site impacts include minor disturbance of the ground surface within and adjacent to the drill location and a temporary increase in noise levels during drilling and installation of the well. Once the monitoring wells are completed, monitoring of the groundwater will be conducted monthly. No impacts associated with monitoring of these wells have been identified.</p> <p>All of the proposed drilling locations are previously disturbed areas (farm equipment storage yards or orchards) on private property. Field surveys for State and federally "listed" plants and animals, jurisdictional wetlands, and archaeological resources were completed at each of the proposed drill locations, with no unavoidable adverse impacts identified. The purpose of the project is to collect basic data on groundwater level fluctuations, monitor changes in groundwater quality, and conduct geologic exploration.</p>	NOE

2004058280	Chamberlain Ck. Camp: Replacement Leach Field Resources Agency, The Fort Bragg--Mendocino The project is necessary to better meet health and safety code requirements of a government correctional facility. This project will upgrade and increase the capacity of the existing septic and gravity-feed leachfield treatment system at the Chamberlain Creek Conservation Camp. The current septic tank is outdated and under-capacity for the camp needs; and the existing two leachfields at the entrance to the camp are not well-placed in terms of soil percolation. This project involves trenching for three objectives: (1) replacement and installation of a new 20,000 gallon septic tank, a 5000 gallon kitchen grease interceptor, and 4 new manholes; (2) installation of a new pipeline to the mound system, and; (3) installation of the new mound fields. A Categorical Exemption was filed for this project in 2003 but has changed in scope from a leachfield system to a Wisconsin Mound Soil Absorption System, in accordance with a design approved by the North Coast Regional Water Quality Control Board Basin Plan. 	Plant), located in the city of La Verne. Metropolitan proposes to authorize the Weymouth Reliability Assessment, which will focus on plant reliability, including identification of equipment and facilities that may need to be upgraded to ensure reliable plant operation in the future. The assessment will address the condition, age, redundancy, and operating and maintenance history of equipment such as pumps, valves, mechanical systems, and the structures that house this equipment. Metropolitan also proposes to authorize the La Verne Power System Upgrade Study, which will include investigations to identify necessary improvements to the electrical power system at the Weymouth Plant to ensure continued reliable operation of the plant.		
2004058284	Dam Safety and Rehabilitation Program - Transfer of Previously Authorized Funds, Upgrade of Dam Monitoring Systems, and Awaras Agreement Metropolitan Water District of Southern California --Los Angeles The Metropolitan Water District of Southern California (Metropolitan) has established the Dam Safety and Rehabilitation Program to review the adequacy of Metropolitan's dams, evaluate risks, and identify alternative solutions to minimize risks. Metropolitan's Board authorized funding in November 1997 to upgrade dam monitoring systems, improve the accuracy of facility data, and conduct water discharge studies under the former Infrastructure Review and Rehabilitation Program. In order to consolidate activities related to the Metropolitan's dams, the dam monitoring systems project will be moved and funds will be transferred to the Dam Safety and Rehabilitation Program. Additionally, a previous investigation of Metropolitan's dam seepage and seismic monitoring systems identified the need to improve the monitoring systems at all Metropolitan reservoirs, dams, and embankments, except for the dams at Diamond Valley Lake. Implementing the recommended upgrades will enable staff to remotely collect monitoring data and permit quick response to seepage rate changes. Also, Metropolitan has authorized an agreement with RocTest to perform the design and installation of upgraded seepage monitoring equipment.	NOE	
2004058285	Palos Verdes Reservoir Erosion Control Project Metropolitan Water District of Southern California Rolling Hills--Los Angeles The Metropolitan Water District of Southern California Metropolitan proposes to conduct reservoir slope erosion repairs, grading, and install an approximate 12-foot- long, eight-foot-wide concrete drainage ditch and riprap pad to control runoff flows and eliminate future slope erosion. 2004058326	Repair Virgin Creek Bridge Parks and Recreation, Department of --Mendocino Replace rotten and damaged decking boards on the Virgin Creek Bridge with Trex lumber. The bridge spans a section of the old haul road at MacKerricher State Park, which is used by the visiting public for walking, bicycling, and horseback riding. Park staff has vehicle access across the bridge. The decking has deteriorated to the extent that it is now considered a safety hazard. All work will be performed from the top of the bridge; there will be no disturbance of the channel bed or banks and no materials associated with the repair will enter Virgin Creek. Cultural review has determined that the bridge is not of historic significance.	NOE

2001111119	St. Vincent's Mercy Housing Project Santa Barbara, City of Santa Barbara--Santa Barbara The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 (SAA# 1600-2004-0009-R5) of the Fish and Game Code to the project applicant, Ben Phillips of Mercy Housing California. The applicant proposes to construct low income and senior housing, requiring replacing a vehicle bridge, a new pedestrian bridge, and the relocation of a small tributary. The project is located in the City of Santa Barbara, Santa Barbara County.	NOD	
2003012051	Sugarloaf Ridge State Park Preliminary General Plan Parks and Recreation, Department of Santa Rosa--Sonoma Park improvements are identified in the General Plan's goals and guidelines, including protection of water quality, provision of primitive campsites, protection of large expanses of preserved wildland areas, and development of key trail connections linking the broader and newly expanded areas of the Park. Construction of a trailhead and parking lot at an abandoned quarry site would also support public access into the newly acquired Nunns Canyon property. The hub of visitor-serving facilities would remain in Adobe Canyon and limited expansion of facilities in this area is recommended. Expansion of the visitor center and the Robert Ferguson Observatory would allow for improved interpretation opportunities. Relocating the large group camp away from the observatory would resolve existing light conflicts between the two uses. Re-development of a small equestrian group campground with corrals is proposed near the stable concession. Moderate expansion of the family campground and picnic facilities would also help meet some of the expected increase in visitor demand.	NOD

Remodel the existing JPV building to add 7,625 sq. ft. of new interior space, creating a larger second and third floor, for 21 offices, conference room and storage; for a total winery area of 92,218 sq. ft.; d. Relocate the existing crush pad area from the west side of the Innisfree building to the east side; e. Recognize existing number of 56 F/T employees and 15 part time employees; f. Add 4 full time employees and 2 part time employees (for a new total of 60 F/T and 15 P/T); g. Add 47 visitor and employee parking spaces to the north side of the Innisfree building; h. Expansion of the parking area adjacent to the JPV building from 33 parking spaces to 60 parking spaces; i. Widen the existing access driveway to the Innisfree building and new Insignia building; for a new total impervious site coverage 444,363 sq. ft.; j. Improve and expand the wastewater system to accommodate both domestic and winery wastewater; and k. Request for 2-4 temporary office/storage trailers during construction. The construction materials will vary to match existing architectural style while utilizing the natural terrain of the area. Access to the facility is provided via the existing private drive from Taplin Road. The existing driveway that provides access to the Insignia building and proposed barrel storage building will be improved to comply with County standards, except in locations within the creek setbacks, in which a road exception has been granted. All associated improvements will require the removal of 54 oaks, poplar and redwood trees varying in size from 6 inches in	NOD

	77 lot subdivision with a park/basin lot on a 52.7 acre parcel.		
2004051133	Hemet High School Stadium Complex Hemet Unified School District --Riverside The project is intended to serve an existing high school facility and would include three basic components, each with its own ancillary features: a 5,000-person capacity athletic stadium (with elevated lighting and a low impact sound system); dual soccer fields, and parking for approximately 550 vehicles. In addition, a signalized pedestrian crossing is proposed for installation mid-block on Stetson Avenue between Dartmouth Street and Stanford Street, subject to County approval. The District anticipates the scheduling of approximately 20 major events per year that have the potential to draw capacity crowds and require the use of both the facility's public address and field lighting systems. Soccer fields and parking would be used on a daily basis by Hemet High School. When not in use by the high school, the proposed facilities would be made available to the public.	NOP	06/22/2004

<u>Documents Received on Monday, May 24, 2004</u>			
2004058347	<p>Issuance of Streambed Alteration Agreement #04-0050, Unnamed tributaries to Pine Creek and Little Pine Creek, Humboldt County Fish & Game #1 --Humboldt</p> <p>The project will replace failed, undersized and damaged culverts and log bundle crossings on private timber access roads in the Little Pine Creek drainage. Existing culverts are sized for maximum 50 year storm events, are rusted out, or are plugged or have failed. Replacement culverts will be sized for the 100-year storm event.</p>	NOE	
2004058348	<p>Issuance of Streambed Alteration Agreement #04-0062 & #04-0063, Clear Creek, tributary to the Sacramento River, Shasta County Fish & Game #1 Redding--Shasta</p> <p>The project proposes to inject up to 10,000 tons of clean spawning size gravel into two locations on Clear Creek. Approximately 5,000 tons will be injected below the Clear Creek Road bridge. The gravel will be placed adjacent to the low flow channel, and allowed to disperse at high flows to provide fish spawning habitat improvement.</p>	NOE	
2004058349	<p>Issuance of a Streambed Alteration Agreement #04-0024, Sacramento Gulch, tributary to Sacramento River, Shasta County Fish & Game #1 Anderson--Shasta</p> <p>The project proposes to install two energy dissipaters in Sacramento Gulch, tributary to Anderson Creek.</p>	NOE	
2004058350	<p>Issuance of a Streambed Alteration Agreement #04-0055, Gilbert Creek, tributary to Pacific Ocean, Del Norte County Fish & Game #1 --Del Norte</p> <p>The project proposes to repair an existing levee and install a head gate with a control valve in the levee along Gilbert Creek.</p>	NOE	
2004058351	<p>Issuance of a Streambed Alteration Agreement #04-0035, Hayfork Creek, Tributary to Trinity River, Trinity County Fish & Game #1 Hayfork--Trinity</p> <p>The project proposes to repair bridge footings on a private bridge over Hayfork Creek, tributary to Trinity River.</p>	NOE	
2004058352	<p>Issuance of Streambed Alteration Agreement #04-0057, Coffee Creek tributary to Trinity Lake, Trinity County Fish & Game #1 --Trinity</p> <p>The project will move large cobble rocks from the center of the low flow channel of Coffee Creek to the banks to protect an existing bridge from damage during flood events. Approximately 150 linear feet of stream channel will be affected. An excavator bucket will pull rocks from the flowing channel, but will not operate from the stream channel.</p>	NOE

2004051134	Sunset Crossroads Specific Plan Banning, City of Banning--Riverside The Sunset Crossroads project encompasses a total of 548.4 acres of land located within the San Geronio Pass area of Riverside County, California. Approximately 293 acres are within the corporate limits of the City of Banning and approximately 255 acres lie within the sphere of influence of the City of Banning in an unincorporated portion of Riverside County.	CON	06/14/2004
2004052119	Parcel Map Application No. 2004-13 - Sun Dry Products Stanislaus County Patterson--Stanislaus Request to create parcels of 67.0 and 252.96 acres in an A-2-40 (General Agriculture) zoning district. The purpose of the project is to legally separate two existing businesses, the 67 acre one producing compost for agricultural use from green waste. The other is a recycling facility which includes 75 acres of Vermiculture producing a soil amendment, 80 acres of concrete surface (former runways on this old air field) used to process pomace into animal feed, and for feedstock storage and blending. Various other waste streams are recycled on a more limited basis. There will be no new uses as a result of this parcel map. The composting facility which was granted a use permit in February 2003 to move to and occupy 55 acres of orchard land on the south side of Gaffrey Road will remain at its current site.	CON	06/10/2004
2003081071	Burbank Media Center Burbank, City of Burbank--Los Angeles The Draft EIR prepared for the proposed project evaluated five different development scenarios proposed by the applicant to provide sufficient information to allow the City to consider the type, intensity and configuration of land uses that would be appropriate for this site. The five development scenarios are described in more detail below.	EIR	07/08/2004

Development Scenario No. 1: This scenario consists of 674,826 square feet of

	development in 3-, 6-, and 11-story buildings. The proposed uses include 393,875 square feet of media-related office, 175 condominium units, a health club, a childcare facility, retail / restaurant space and a new church facility. Parking would be provided in a fully subterranean parking structure.		
	Development Scenario No. 2: This scenario consists of 616,826 square feet of development in 3-, 6- and 9-story buildings. The proposed uses include 360,100 square feet media-related office, 164 condominium units, a health club, a childcare facility, retail / restaurant space and a new church facility. Parking would be provided in a fully subterranean parking structure.		
	Development Scenario No. 3: This scenario consists of 551,239 square feet of development in 3- and 6-story buildings. The proposed uses include 531,239 square feet media-related office space and approximately 20,000 square feet of retail/restaurant space. Parking would be provided in a fully subterranean parking structure.		
	Development Scenario No. 4: This scenario includes 651,685 square feet of development in 3-, 6- and 10-story buildings. The proposed uses in this scenario include 213,374 square feet of media-related office, 268 condominium units, a health club, a childcare facility, retail / restaurant space and a new church facility. Parking would be provided in a fully subterranean parking structure.		
	Development Scenario No. 5: This scenario includes 501,462 square feet of development in the 3-, 6- and 9-story buildings. No media-office space is proposed in Scenario 5. The proposed uses would consist of 298 residential condominium units, a health club, a childcare facility, retail / restaurant space and a new church facility. Parking would be provided in a fully subterranean parking structure. Scenario 5 would require the approval of a General Plan Amendment.		
2004052116	Blue Lake Expansion: Pavilion Bingo & Event Center Blue Lake Rancheria Blue Lake--Humboldt The Proposed Action consists of the development of a Pavilion addition to the Blue Lake Rancheria's Casino on the existing Blue Lake Rancheria parcel. The proposed Pavilion facility will cover up to approximately 15,000 sq. ft. of surface area, including the main structure and some small support buildings.	FIN	06/25/2004
2004051138	Monterey Bay Sea Floor Cabled Observatory California State Lands Commission --Monterey Place 51 kilometers of fiber optic cable and place scientific nodes on the ocean floor within Monterey Bay and the Pacific Ocean.	NOP	06/23/2004
2004052122	Conjunctive Use Water Supply Project Soquel Creek Water District --Santa Cruz The District will evaluate the potential impacts associated with implementation of the Conjunctive Use Water Supply Project at a program - level of detail. The two conjunctive use alternatives that will be evaluated in the EIR include a regional seawater desalination project and a water import/groundwater banking regional project involving the Pajaro Valley Water Management Agency. 2004052118	Del Rio Market and Deli San Joaquin County --San Joaquin The project is a Use Permit application to construct a 3,916 square foot agricultural store and 1,248 square foot covered walkway to sell fruits, vegetables, and a limited amount of retail sundries.	Neg	06/23/2004
2004052120	SCS Engineers; APN 305-171-15 (Fields Landing Area); Case Nos.: CUP-03-31 Humboldt County Planning Department --Humboldt A Conditional Use Permit for the excavation of approximately 700 cubic yards of soil (6' deep) impacted with low levels of a variety of petroleum hydrocarbons and approximately 300 cy of asphalt. The work area will be +/- 4,000 sf in size. The excavated material will be contained elsewhere on-site by placement on 10-mile visqueen and treated on-site through an aeration process involving weekly turning to promote biological breakdown of the minor soil contamination. It is anticipated that the biological process and aeration will reduce contaminant levels to non-detectable levels within approximately 45 days. The project is mandated by the County's HazMat Division of the Environmental Health Department. Total parcel size in approximately 40 acres. Site is located on the waterfront between the communities of Fields Landing and King Salmon. The project site is located within the Coastal Development Permit (CDP) jurisdictional area of the California Coastal Commission, and a CDP or waiver is required from the Coastal Commission.	Neg	06/23/2004
2004052121	P.M. #03-34, Ben Parra Tehama County Corning--Tehama To create three parcels; Parcel A of approximately 5.1 acres and Parcels B & C of approximately 2.00 each acres in an R1-A-MH-B-86; One Family Residential - Special Animal Combining - Special Mobile Home Combining - Special Building Site Combining (86,000 sq. ft.; 2.0 acre minimum) Zoning District. The project is located north of the City of Corning, on the southwest corner of the Edith Avenue/Gallagher Avenue intersection. APN: 069-140-27. Approximately 9.1 acres.	Neg	06/23/2004
2004052124	Lake County Housing Element Update Lake County Community Development Department --Lake The 2004 Housing Element Update is a comprehensive statement by Lake County of its current and future housing needs and proposed actions to facilitate the provision of housing to meet those needs at all income levels. 2004032145	River Road Viaduct Project Sonoma County Permit and Resources Management Department --Sonoma The Department of Transportation and Public Works proposes the construction of a one lane, three-span viaduct above a landslide area on River Road 300 feet west of Eagle Nest Lane in Rio Nido. The viaduct will be approximately 140 feet long and 20 feet wide. Additionally, the existing 60-foot viaduct (east of the new viaduct) will be widened by one foot to create a consistent shoulder width of eight feet on the east bound lane in the project area. Guard rail will be replaced at the project site for approximately 200 feet. The project will prevent future undermining of the roadway by potential landslides. Construction of the viaduct will require the east-bound travel lane to be closed to through traffic. One-lane traffic control will be installed with temporary traffic signals at both ends of the project site.	NOD	
2004059065	Petaluma River / Trail Enhancement Petaluma, City of Petaluma--Sonoma The Petaluma River / Trail Enhancement project will make improvements at eight locations along the Petaluma River within the City of Petaluma, to restore existing structures and provide public access. The project extends from "D" Street in the south to Washington Creek in the north.	NOD	
2004059066	Franz Creek Invasive Species Removal and Native Plant Revegetation Project Sotoyome Resource Conservation District Healdsburg--Sonoma Invasive plant eradication program along Franz Creek on the Jackson Family Investments property, approximately 1/4 mile upstream from Chalk Hill Road, Healdsburg, Sonoma County. The target species for eradication are blue periwinkle (Vinca major), Himalayan blackberry (Rubus discolor), and mugwort (Artemisia douglasiana). These plants are hosts for Pierce's disease.	NOD	
2004058425	Furnish Spare Impellers and Diffusers - Units 1, 3, 5, 7, 9 & 13, A.D. Edmonston Pumping Plant Water Resources, Department of, Division of Engineering --Kern This contract will furnish spare impellers, diffusers, interstage bushings, wearing rings, wear plates, and templates for the BLH pumps (Units E1, E3, E5, E7, E9, E11 and E13) of the A.D. Edmonston Pumping Plant. The purpose of these spare components is to reduce the refurbishment time of each pump from a minimum of 9 months to 7 months. This will reduce the possibility of on-peak pumping and will increase the reliability and availability of these pumping units to meet the current and future water demand. Beneficiaries are the people of the State of California.	NOE	
2004058426	Guy Fleming Bathtub Plumbing (03/04-SD-39) Parks and Recreation, Department of --San Diego This project consists of the replacement of deteriorated waste and water supply piping servicing the bathtub of the Guy Fleming residence (c. 1920 National Register of Historic Places) located in Torrey Pines State Reserve. To access pipes, it will be necessary to open two walls adjacent to the bathtub and the jackhammering of concrete to expose the waste line. The waste and water piping will be replaced with new piping and the wall will be reconstructed to match original fabric and style of historic home.	NOE

	building, and three dormitory buildings that would house 200 students. Phase 3 (2013-2022) includes the construction of the chapel/music classroom building and one classroom building.		
2003081023	2004 Long Range Development Plan (LRDP) University of California La Jolla--San Diego The 2004 UCSD LRDP will propose general types of development and land use to support projected on-campus population growth at UCSD and to enable expanded and new program initiatives through the 2020-21 academic year. In addition, three specific projects will be analyzed in the LRDP EIR as well. These include a new 1,400 space parking structure, an 85,000 gsf building to house UCSD's new School of Management, and an 80,000 gsf addition to the existing Supercomputer Center Building.	EIR	07/09/2004
2003091118	Meyer Ranch / Arboleda Specific Plan King City King City--Monterey The project applicant has applied to the City of King to develop 400 residential lots and parklands in conformance with the proposed Arboleda Specific Plan/Vesting Tentative Tract Map. The Specific Plan also includes a 22 acre school site. The Specific Plan provides the City, project applicant, and the public a framework for understanding the types of development that will occur on the site and how it will be implemented. The proposed Specific Plan includes a land use plan, development standards, infrastructure plan, and phasing plan. The application includes a General Plan Amendment, Vesting Tentative Tract Map approval, and a 25 foot easement over 1,000 feet of private property for a future storm drain pipeline. The project, as proposed, includes the development of 115.29 acres of land on a portion of the Meyer Ranch, situated at the northwest corner of San Antonio Drive and Speckles Road in King City, California. The project site is currently undeveloped and is comprised of a single parcel, which is designated by the General Plan as Planned Development. The project designates approximately 15 acres of the site as a 200-foot-wide agricultural buffer zone, a site for a 22-acre middle school, and approximately 8.4 acres of parkland. The residential portion of the project includes 400 homes; seven distinct types of housing are proposed: carriage apartments, courtyard apartments, town homes, cottages, small single family homes, large single family homes, and lane homes. Infrastructure requirements include roads, water and wastewater conveyance systems, and storm water conveyance systems.	EIR	07/09/2004
2004031041	Brush Management Revisions to the Land Development Code and Federal Grant from the Office of Emergency Services (OES), Federal Emergency Management Agency (FEMA) San Diego, City of San Diego--San Diego Brush Management Revisions to the Land Development Code and Federal Grant from the Office of Emergency Services (OES), Federal Emergency Management Agency (FEMA) Council Approval to allow for revisions to the Municipal Code Chapter 12, Article 2, Division 4 to modify the requirements of brush management pursuant to the recommendations of the Fire Chief as a result of the 2003 Cedar Fire. The project proposes a City wide 100 foot brush management zone consisting of 35' of Zone One and 65' of Zone Two. Project implementation on City property is proposed to be initially funded by a grant from the Office of Emergency Services (OES). Federal Emergency Management Agency (FEMA).	EIR	06/24/2004

	northbound lanes down to a single through lane. The southbound left turn lane will be moved 3.6 meters north so that the left turning vehicles will only need to cross one lane of traffic. The roadway will be resurfaced with a thin 30mm AC blanket to replace the striping and recessed markers. Approximately 299 meters of shoulder backing will be placed along the southbound lane near the crest at post mile 29.4. Approximately 76 meters of embankment along the northbound lane may need to be reshaped near the crest.		
2004058445	Recoating A segment of the First Los Angeles Aqueduct Pipeline Known as "Soledad Syphon" Fish & Game #5 --Los Angeles The Operator proposes to alter the streambed by Recoating a segment of The First Los Angeles Pipeline known as "Deadman Syphon." The recoating would be accomplished in three successive steps as follows; 1) Cleaning of the surface via hydroblasting; 2) applying a water-based primer or sealant via sprayer, and 3) applying a water-based paint via a sprayer. A catch basin lined with plastic would be placed beneath the pipe during work to collect runoff. Liquids and solids collected in the catch basin would be properly disposed of offsite. Motorized vehicles would be parked in the work area lined with plastic or canvas tarps to ensure that leaking fluids are contained. The work is being conducted between Stations # 322+00 and 365+00. Wash material coming off of the pipe will be placed in a tanker tank (or similar) and removed from the site. A truck-manlift would be used to raise a worker in applying the coatings.	NOE

2002082043	Martin Slough Interceptor Project Eureka, City of Eureka--Humboldt The Martin Slough Interceptor Project is proposed in order to increase the reliability of the City's existing wastewater collection system for avoiding wastewater overflows in the project area, as well as increasing the cost-effectiveness of the system's operations. The proposed project generally includes elements in three major segments: (1) a collection system for wastewater from a new "interceptor" pipeline, all operating primarily under the influence of gravity; (2) a new pump station, located at Pine Hill Road and Myers Avenue; and (3) a new pressure sewer line (or "force main") that will connect the new pump station to the existing wastewater treatment facility. The new collection system and force main elements will essentially all be located below the ground surface. The pump station will be a relatively small structure, on a built-up site approximately 50 feet by 60 feet, which will include landscaping and parking areas for maintenance vehicles. See DEIR for complete Project Description.	EIR	07/12/2004
2003051046	Old Armenian Town Project Fresno, City of Fresno--Fresno The Old Armenian Town Project is a phased mixed-use development to be implemented through a master plan, which includes construction of the 5th District Courthouse, by the State of California. The project proposes development (in two phases), of office uses, retail uses, and an Armenian Cultural Center. The project would also include a 50 space on-site parking lot, with an additional six-story, 700 space parking structure.	EIR	07/12/2004
2004012105	Lundy Avenue & McKay Drive Residential Project General Plan Amendment and Planned Development Rezoning GP03-04-04 and PDC04-001 San Jose, City of San Jose--Santa Clara The proposed project would change the City of San Jose General Plan Land Use/Transportation Diagram designation from Industrial Park to Medium High Density Residential (12-25 DU/AC). The proposed project would also rezone the 17.38-acre site from IP-Industrial Park Zoning District to A (PD) Planned Development Zoning District to demolish 2 existing industrial buildings totaling 176,665 square feet and allow up to 313 single family attached condominium and townhouse residences. 	TDF handling system), and would not affect cement production levels.		
2004052140	Oakland International Airport Materials Management Program Oakland, Port of Oakland--Alameda The Port of Oakland proposes to develop a program to manage waste materials generated from ongoing construction, demolition, and maintenance projects at the Oakland International Airport (OIA) over the next several years. It is estimated that several OIA projects will generate more than 100,000 cubic yards of recyclable waste material over the next five years.	JD	07/30/2004
2004051154	Mission Gardens Tract Map ED 03-164 (TR2527) San Luis Obispo County --San Luis Obispo The proposed project is a subdivision of 50.61 acres into a 60 lot residential development with lots ranging in size from 6,001 to 11,634 square feet within a 12.41 acre area, a 31.7 acre open space parcel (Lot 61) and two remainder parcels of 3.95 and 2.48 acres (Lots 62 and 63, respectively). The project involves grading and installing improvements and utilities resulting in the disturbance of approximately 13 acres and movement of approximately 30,000 cubic yards of cut and fill. Earthwork is anticipated to balance on-site with equal amounts (15,000 cubic yards) of cut and fill.	NOP	06/28/2004
2004051155	Downtown Civic Center Ontario, City of Ontario--San Bernardino The Downtown Civic Center project involves the development/redevelopment of approximately 31 acres of land to create an "urban village" to help revitalize the downtown area by introducing new, urban, housing types and mixed-uses (retail/multi-family). The objective of this project is to create a high quality, mixed-use development consisting of market rate and affordable multi-family units, retail development and the potential adaptive re-use or restoration of existing historic buildings.	NOP	06/28/2004
2004052133	Campus Wastewater Treatment Plant Expansion University of California Davis--Solano, Yolo The project involves expansion of specific modular components of the campus' wastewater treatment plant to meet campus demands for treatment capacity anticipated through 2013. The current WWTP is designated to treat an average daily flow of 2.5 million gallons per day (mgd), and the expansion would allow for an average treatment of 3.6 mgd. The expansion would also improve treatment reliability and the plant's ability to meet current and anticipated future effluent regulatory requirements.	NOP	06/28/2004
2004051148	Don Pedro Wastewater Treatment Facility Mariposa County --Mariposa Property purchase for future use and development of the Don Pedro Wastewater Treatment Facility.	Neg	06/28/2004

2004051149	<p>P04-0037 Riverside, City of Riverside--Riverside On March 20, 2003, the Planning Commission approved a Specific Plan amendment to remove the subject property from the Sycamore Canyon Business Park Specific Plan (SCBPSP) and adding it to the Sycamore Highlands Specific Plan (SHSP). As well, three parcels to the south were also added to the SHSP. At the time of this approval, no project was proposed on the subject property and environmental review was required prior to any grading on this site.</p> <p>The applicant is now proposing an environmental review of grading for the proposed parcel for a possible future auto dealership or other auto related use in accordance with the SHSP. The lot is approximately 7.3-acres southerly of Box Springs Boulevard and easterly of Sycamore Canyon Boulevard in the C-3-SP - General Commercial and Specific Plan (Sycamore Highlands) Combining Zones.</p>	Neg	06/28/2004
2004051150	<p>Sacher Building Re-Use Fountain Valley, City of Fountain Valley--Orange The project to remodel an existing vacant concrete tilt-up single story light industrial building for the retail sale of household goods/furniture. The building is approximately 36,480 square feet. There are 130 existing parking spaces on the site and the property requires 117 spaces, based on the parking code. The project proposes to enter into a reciprocal parking agreement with an adjacent property owner to share parking with the adjacent, which will provide an additional 88 parking spaces, if necessary.</p>	Neg	06/28/2004
2004051151	<p>Newhope Design Corridor Fountain Valley, City of Fountain Valley--Orange The project proposes to construct four buildings and remodel an existing building. A new food/retail building will be constructed at the southwest corner of Talbert Avenue and Newhope Street, two buildings will be constructed at the southeast corner of Talbert Avenue at Newhope Street, a furniture showroom building will be constructed at the corner of Euclid Street at Newhope Street, and the building 74,245 sf of space. The project proposes 415 parking spaces, whereas the City parking code requires 376 spaces. A reciprocal parking agreement with the project applicant and an adjacent property owner, which is not part of the project, will allow project customers to use the existing parking spaces on the adjacent property, if necessary.</p>	Neg	06/28/2004
2004051152	<p>Klingbeil New SFD Santa Barbara County --Santa Barbara The proposed project is for the construction of a 2,550 square foot single family dwelling, as well as a swimming pool and spa, at 121 Pomar Lane in Montecito. Approximately 160 cubic yards of cut and 50 cubic yards of fill are proposed to prepare the site for development. Much of this grading will occur within 50 feet of Oak Creek for flood control purposes. Several Fruit trees are proposed to be removed, and no riparian vegetation along Oak Creek is proposed to be removed. The site would be served by the Montecito Water District, Montecito Sanitary District, and the Montecito Fire Protection District.</p>	Neg	06/28/2004
